HANI HUSAMUDDIN

Frontend & UI Engineer

Yogyakarta, Indonesia me@hanihusam.com linkedin.com/in/hanihusam hanihusam.com

SUMMARY

Open to remote full-time and contract roles. I build product interfaces in React and TypeScript, from Figma to production, and improved LCP and load times by about 30–40% on production web apps.

EXPERIENCE

Insvire (Curious Me, social platform) — Apr 2022 – Feb 2026

Senior Frontend Engineer · Remote (Bandung, Indonesia)

- Led the frontend of Curious Me across the app, the marketing site and the admin dashboard.
- Architected the frontend and shipped the app with React Router, Apollo Client and Firebase.
- Resolved UI performance bottlenecks together with the backend, QA and product teams.

Know Your Customer (KYC platform) — Sep 2021 – Jan 2022

Senior Frontend Engineer · Remote (Hong Kong)

- Rebuilt core KYC products for their next version, with a faster, more compliant identity check.

Currinda (conference platform) — Oct 2020 – Aug 2021

UI Engineer · Remote (Melbourne, Australia)

- Built reusable React components and a design system for faster, consistent frontend work.
- Bridged design and code for a 4-person engineering team, cutting the back-and-forth.

PROJECTS

Coverse Studio (templates for freelancers and job seekers) — 2021 – Present

Remote

- Freelandeck, my client pitch deck template, is used by 55,000+ people on Figma Community.
- Design and build each product: the Figma files, the landing pages and CV Pro's file generator.
- CV Pro: an open-source parser (OpenResume) read every field of its six one-page examples.

SKILLS

React · TypeScript · Tailwind CSS · GraphQL · Web Vitals · Design systems · Figma · Storybook

EDUCATION

Bachelor's Degree in Computer Science — 2019

Universitas Pembangunan Nasional "Veteran" Yogyakarta
